ANUSHA S

OBJECTIVE

To work in an organization where I can acquire new knowledge and sharpen my skills and put my efforts for achieving organizational and individual goals.

ACHIEVEMENTS

Participated in National Conference on “Application of Artificial Intelligence” held by RNSFGC.

PROJECTS

Toxic Speech classification Using Machine Learning

In today's era of online social media platforms, there has been a massive surge in the propagation of toxic content speech. They provide many betterments.

Twitter Based Tweet Summarization

Short-text messages such as tweets are being created and shared at unprecedented rate. Tweets, in their raw form, while being informative, can also be overwhelming. We used PHP as a frontend. MySQL was used for the database operations. Xampp server for web development environment.

Smart Home Security System Using IOT

Now Technology has spread in every field of our lives. In present era, everybody is having some kind of connectivity with technology whether in form of mobile, laptop or others. Here we are going to discuss the use of technology in field of home security.
